SUMMARY

A final-year Computer Science (Honours) student specializing in cybersecurity. Experienced in Web and Network Penetration testing, risk management, digital forensics, vulnerability assessment, and IT system implementation. Trained in offensive security operations alongside technical troubleshooting, networking, Windows system administration, and customer support best practices. Skilled in Linux, Burp Suite, Nmap, and other security tools. Actively participating in CTF competitions. Passionate about building secure, efficient, and innovative technology solutions.

SKILLS

- **Penetration Testing & Systems Administration:** Web/Network penetration testing, troubleshooting hardware/software issues, Windows system administration, networking, Active Directory, remote access.
- **Cybersecurity & Network Security:** OSI Model, network defense, threat analysis, vulnerability assessment, incident response, firewalls, SIEM, cryptography, risk management.
- **Programming & Development:** Python, Java, SQL, HTML, CSS, JavaScript.
- **Tools & Platforms:** Wireshark, Nmap, VirtualBox, Burp Suite, Metasploit, Nessus, OpenVAS, OWASP ZAP, GitHub, Google Workspace, VS Code.
- **Soft Skills:** Analytical thinking, problem-solving, teamwork, communication, time management, independent learning, technical documentation.

EDUCATION

Bachelor of Computer Science (Cybersecurity)

Albukhary International University

Alor Setar, Malaysia

Oct 2023 – Present

- CGPA: 3.58/4.00 — Expected Graduation: October 15, 2026
- Relevant Courses: VAPT, Digital Forensics, Cryptography, Risk Management, Information Security, Networking, Operating System, DSA, Software Engineering, Cybersecurity System.

EXPERIENCE

Bug Bounty Hunter (Independent)

Independent Security Researcher

Yes we hack, HackerOne

Aug 2025 – Present

- Actively hunting for security vulnerabilities on various platforms using the OWASP Top 10 as a framework.

Digital Empowerment Network

Intern

Remote

Jul 2025 – Sep 2025

- Assisted in penetration testing, digital forensics, malware analysis, and honeypot monitoring.
- Gained hands-on experience using security tools such as Kali Linux, Burp Suite, Nmap, Wireshark, Autopsy, Flare VM.

YoungDev Intern

Remote Intern

Remote

Dec 2024 – Jan 2025

- Used industry-standard tools for security testing and made reports.
- Worked on firewall rules, network traffic monitoring, Nmap scans, phishing email identification, web application pentesting.

CTF Player

Cybersecurity Competitor

Various Platforms

Ongoing

- Actively practicing CTF on TryHackMe, CyberTalents, and PicoCTF.

PROJECTS

SecureCrop – Soil Data Secure Crop Recommendation System

<https://github.com/ParvejRafi/SecureCrop>

- Developed a data-driven crop recommendation system that securely analyzes soil data to provide intelligent agricultural insights.

Cyber Awareness Simulation Platform

<https://github.com/ParvejRafi/CyberAwarenessSimulation>

- Created an interactive cybersecurity awareness platform that educates users about cyber threats through scenario-based modules.

Web Penetration Testing – University Systems

- Discovered API rate-limiting vulnerability in password reset endpoint; documented risks and recommended security controls.

Albukhary Zero Hunger Platform

<https://github.com/ParvejRafi/Albukhary-zero-hunger-platform>

- Designed and developed a secure web-based platform to manage food donations and distribution efficiently.

Hospital Management System

<https://github.com/ParvejRafi/Hospital-Management-System>

- Built a PHP/MySQL-based system to streamline patient registration, appointment scheduling, medical records management.

CTF COMPETITIONS

Capture The Flag (CTF) Competition 2026 – Albukhary International University (AIU)

On-site — January 7, 2026

- Winner (1st Place) among 10 teams, scoring 210 points. Awarded an RM 1,500 prize.

Capture The Flag (CTF) Hackathon v3.0 – Curtin University Malaysia

24-hour Online — December 6–7, 2025

- 1st place among AIU teams and 31st place nationwide, scoring 5,476 points.
- Solved challenges in web security, cryptography, digital forensics, Linux, and networking.

Capture The Flag (CTF) – Integrated Hawkers

Online — January 14, 2026

- 58th place out of 139 participants, scoring 535 points. Solved challenges in cryptography, web security, miscellaneous.

CERTIFICATIONS

- PCEP Certified Python Programmer
- Jr Penetration Tester (TryHackMe)
- Foundation of Cybersecurity (Coursera)
- Introduction To Linux
- APIsec Fundamental

EXTRA-CURRICULAR ACTIVITIES

- **Honors & Awards:** Recipient of Albukhary Foundation Scholarship and 5x Dean's List Honors, IIEC 2026 Gold Awardee.
- **Workshop:** STI Madani Event Trainees, PLUS Malaysia Cyber Awareness Workshop.
- **IT Mentor & Content Creator:** Founder of DarkPacket and Co-founder of Neuralnux.
- **Languages:** Bengali (Native), English (Fluent), Malay (Basic).
